PROFILE

Cybersecurity B.Tech student skilled in Networking, Linux, Bash scripting, Kali Linux tools and Web Development. Experienced in executing projects focusing on these areas, with a passion for enhancing Digital security.

INVOLVEMENTS

- College Cybersecurity Club Member
- Google Developers Student Club (GDSC PIET) Member
- Workshops & CTFs Volunteer

PROFESSIONAL DEVELOPMENT

Actively attending Events, Workshops, CTFs, conducting researches as well as seeking knowledge from all available resources.

- Google Cybersecurity Professional (Jan 2024 – Mar 2024)
- Cyber Security Training by Imarticus Learning (60 Hours) (Jan 2023)
- Python for Data Science (IBM) (Jan 2022)
- Python Bootcamp (Feb 2022)

KEY SKILLS

- HTML & CSS
- Bash scripting
- Python
- Web-Penetration Testing
- Automation
- OWASP Top 10
- Burp-Suite
- Computer Networking
- Reconnaissance
- File Recovery

PROJECTS

Automation Script using Bash

I've developed a Bash script project on Kali Linux that conducts reconnaissance and vulnerability exploitation on targets. It efficiently gathers information and utilizes Kali tools to exploit vulnerabilities, enhancing security assessment capabilities.

MovieZone

I've built a movie website using HTML, CSS & JavaScript, showcasing my skills in front-end development.
