PROFESSIONAL DEVELOPMENT

Organise conferences, create content, conduct security research or training to teach hacking techniques based on previously discovered vulnerabilities.

- Google Cybersecurity Professional Certificate (2022)
- Offensive-Security Certified Professional (OSCP) (2021)

PROFESSIONAL EXPERIENCE

Founder NahamSec, LLC | Remote | 2013 - Present

Organise conferences, create content, conduct security research or training to teach hacking techniques based on previously discovered vulnerabilities.

- Create and organise multiple conferences focused on hacking, education and mentorship with 1200+ attendees ([NahamCon2021](#), [NahamCon2020](#), [VirSecCon2020](#), [h@cktivity2020](#), [h@cktivity2021](#))
- Organise training and present research at a variety of conferences across the world including OWASP AppSec events, THOTCon, DEF CON, BSides, Hackfest Canada, 44Con, EKOparty, and more. ("[It's the little Things](#)", "[Owning the Cloud Through SSRF and PDF Generators](#)", "[Knock Knock Identifying Assets in the Cloud](#)")
- Participate in bug bounty programs with over 700 vulnerabilities in 50+ organisations including SSRF, XSS, Remote Code Execution, leaked credentials and more. Acknowledged by companies such as [Apple](#), [Lyft](#), Red Bull, Google, [Airbnb](#), [Snapchat](#), and Department of Defense

Manager, Hacker Education HackerOne | Remote | 2019 - 2022

Create and organise different learning opportunities for the hacker community, including CTFs, conferences, video content and blog posts to identify hackers with particular skill sets.

- Responsible for the formulation and monitoring of budgets for personnel and day-to-day operations
- Organise Capture the Flag (CTF) events to educate, engage, and recruit new hackers
- Partner and manage third party vendors to create educational content for HackerOne employees, customers and hackers to learn web application hacking techniques

Manager, Hacker Operations HackerOne | Remote | 2017 - 2019

Managed a team of two to improve communication between hackers and customers, increase engagement, as well as recruit new or up and coming hackers.

- Developed and executed data driven processes to identify top performing users to increase engagement on particular customers' bug bounty programs
- Documented and created processes to facilitate communication between hackers and customers in case of miscommunication or disagreements
- Assessed and analysed vulnerability reports for customer and triage teams to evaluate
